Thus, all the Fare Families defined for the requested CFF are targeted in the process.
The total number of mapped CFF must not exceed 6.

Air Item

This element describes all characteristics linked to the air offer. At this level total prices (with/without taxes) are displayed, including references to the flight solution, traveller type and applied Fare Family information.

The first OfferPrice element with OfferItemID always corresponds to the flight solution and must be present in each reply.

If there are chargeable ancillary services available then they will be set as separated OfferPrice elements with unique OfferItemID's, starting strictly from the second position as the first one reserved for the flights in case of VO. These elements are optional.

All non-chargeable ancillary services linked to the flights are stored as Associations under /OfferPrice/RequestedDate and they are optional as well (see "Use Case 2" from section 5).

This element contains information of Offer Item ID, Fare details, Services and Prices.
