

Return Cabin Type Information in OrderView

Description

Previously “UNKNOWN” values were returned under the “CabinType” in the OrderViewRS, but now the proper values are returned following IATA standards.

Process

- In OrderViewRS, the “CabinTypeCode” is returned according to the PADIS Codeset 9873 (Cabin Class of Service) and the “CabinTypeName” reflects the name given for the cabin compartment.
- IATA weblink for PADIS definitions: <https://guides.developer.iata.org/v192/docs/atsb-9873>
