

January 2021

Corporate Identifier (CLID)

Description

This enables to identify the corporate travellers for booking, servicing, and reporting. It also allows them to potentially benefit from personalised offers such as discounted prices, ancillaries, or seat exemptions.

Limitation

It is impossible to add a CLID to an already created order.

Process

- To enable corporate recognition, add the Corporate Identifier (CLID) in the input of the AirShopping or OfferPrice. The CLID is stored in the offer and automatically reused in the following OfferPrice, OrderCreate, SeatAvailability and ServiceList.
- In case a CLID is added to the OfferPrice, it overrides the one previously stored in the offer.
- In post-sale flow, the CLID stored in the order is automatically reused in the OrderReshop, SeatAvailability and ServiceList.
