

# Departure Time-Based Filtering in Airshopping Request

## Description

This enables specifying a time range in AirShopping to get flights in the requested time window only and filter out unwanted offers.

## Process

Departure time criteria for the AirShoppingRQ are added in:

- To get all flights departing after a specific time, indicate it in the field. Use local time and format HH:MM:SS
- To get all flights departing in a time range, use the field to indicate the beginning of the time window and the flight's duration in hours.
