Finnair Private Fares

Description

We configure our fare access based on the IATA number. Thus, only specific IATAs may access specific private fares. If you are a partner implementing with us and need to target private fares for testing, our team will configure the access for a specific IATA test.

1. Travel agent negotiated fares

Our negotiated fares can be targeted with account codes. The account code must be provided in AirShoppingRQ. See the example of AirShoppingRQ in the AccountID field.

2. Corporate fares

Our corporate fares can be similarly targeted with corporate codes. Input your corporate code in the AccountID field in AirShoppingRQ (see the same example above).

In addition, to enable corporate recognition, indicate the Corporate Identifier (CLID) in AirShoppingRQ.

In case of Marine and Travel Agent PEP fares, OSI element should be used - refer to the example of OrderCreateRQ in the InstructionList field.
