

Travel documents

Description

Optional travel document information, Known Traveller Number (KTN), and fiscal (tax) ID can be added at OrderCreateRQ. Please check our [release note](#) on how to add or delete the same information with OrderChangeRQ.

Limitations

- Version 21.3 only.

Process

- OrderCreateRQ: add each travel document (passport, visa), KTN, and fiscal information under a dedicated node of /Pax/IdentityDoc. The same node is used in OrderChangeRQ.
 - o IdentityDocTypeCode is used for differentiation: passport – **PT**; visa – **VS**; KTN – **CR**; fiscal ID – **FS**.
 - o For passport, the following elements are mandatory: CitizenshipCountryCode, ExpiryDate, IdentityDocID, IdentityDocTypeCode, IssuingCountryCode, Surname. Other elements (given name, birth date, gender) are optional and taken from /Pax/Individual automatically if missing. See example.
 - o **Note!** If entered, the name in IdentityDoc does not necessarily have to match the pax name given in /Pax/Individual. This may be useful if pax name contains special characters (umlauts) and document information is entered in MRZ format, while pax name is entered in normal way to match FQTV info.

Description

Example with passport (note different spelling of given name) and visa, KTN, fiscal ID (with only mandatory elements included):
