

Enhanced Operating Carrier information

Description

This functionality enables travel sellers to access the exact operating carrier code and name for each flight segment across all Finnair NDC APIs. By providing this level of detail, it supports more informed booking decisions and enhances user confidence in the accuracy of the information presented.

In scope

- Available in versions 18.1 and 21.3.

Process

When the marketing and operating carriers differ, the disclosure field is populated to explicitly identify the actual operating carrier, ensuring transparency and regulatory compliance.

No additional parameters or input values are needed; this information is automatically incorporated into all requests.

Supported in the following APIs:

- AirShoppingRS
- OfferPriceRS
- OrderViewRS
- OrderReshopRS (Shop)
- OrderReshopRS (Reprice) (version 18.1)

Not supported in the following APIs:

- SeatAvailabilityRS
- ServiceListRS
- OrderCancelRS (version 18.1)
